

Transform to open science in collaboration with OLS & NASA

About OLS:

OLS is a not-for profit organisation dedicated to capacity building and diversifying leadership in research worldwide. By empowering individuals and communities, OLS helps to create impactful, long-lasting contributions to the open science ecosystem.

ABOUT THE PROGRAM

The OLS-NASA Nebula Program is part of NASA's Transform to Open Science initiative (TOPS). NASA TOPS aims to increase adoption of open science practices, and broaden participation in research by engaging underrepresented communities.

Nebula offers six-week-long virtual cohorts, designed for participants at any career stage. The program integrates practical training with individual coaching, supporting participants in applying open science principles, skills, and tools in their work.

Why Join Nebula?

Earn a certification from NASA!

Learn directly from experts and innovators in Open Science.

Engage with a global community of professionals

Apply practical skills in open tools, data, code, and more.

Amplify your impact as an Open Science ambassador in your community.

WHO CAN ATTEND?

Researchers at any career stage, from undergraduates to senior scientists, seeking to enhance their open science practices.

Research-supporting staff aiming to integrate best practices in open and reproducible research into their workflows.

Teams or individuals preparing open science strategies or data management plans, whether at the proposal stage or ready to disseminate results.

Organizations looking to adopt or expand their open science initiatives.

Attend our workshop!

We are inviting you to attend our upcoming Nebula Workshop,
An opportunity to learn about the Nebula Program and its goals.
